

Pranjal Kumar

Front-End Developer | React & JavaScript Specialist

+91 7549575354 | pranjal.221299@gmail.com | LinkedIn | GitHub

Professional Summary

Front-End Developer with hands-on internship experience building responsive, interactive web applications using HTML, CSS, JavaScript, and React.js. Proven ability to design intuitive user interfaces, optimize performance, and deliver real-world projects end-to-end. Experienced in creating component-driven UIs with Tailwind CSS and React, reducing user interaction friction and improving engagement. Seeking to leverage full-stack exposure and modern front-end skills to contribute to impactful, user-focused products.

Key Skills

Front-End:	HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Responsive Design
UI & Interaction:	Component-based Architecture, REST API Integration, AJAX
Back-End & DB:	Node.js, Flask, FastAPI, PostgreSQL, MongoDB, MySQL
Tools & Platforms:	Git, GitHub, Postman, Linux
Languages:	JavaScript, TypeScript, C++, Java, SQL, PHP

Professional Experience

Frontend Developer Intern | Apex Byte | Remote | Oct 2024 – Jan 2025

- Developed a fully responsive portfolio website featuring 10+ interactive UI components using HTML, CSS, and JavaScript, boosting visual engagement and user retention.
- Built a Task Management System with React-style component architecture supporting 50+ tasks per user with real-time creation, editing, and tracking.
- Streamlined UI interactions and task organization workflows, reducing average task completion time by ~40% through intuitive front-end design.
- Collaborated on cross-functional web interfaces ensuring cross-browser compatibility and mobile-first responsive layouts.

Full Stack Engineer Intern | CyberCure Technologies | Remote | Jun 2025 – Jul 2025

- Built a React-based Expense Tracker web application with JavaScript, capable of managing 100+ expense records per user with dynamic real-time UI updates.
- Designed and implemented interactive analytics features to visualize spending patterns across multiple categories using responsive chart components.
- Reduced user interaction steps by ~30% by engineering instant deletion and live state updates, significantly improving overall usability and interface responsiveness.
- Integrated REST APIs for seamless front-end/back-end communication and efficient data flow across the application.

Projects

Pravah | Sept 2025 – May 2025 [Live](#) [GitHub](#)

- Developed full-stack machine learning web application using Next.js (React 19.2 + TypeScript) frontend and Python FastAPI backend, implementing real-time electricity demand prediction for 28 Indian states with scikit-learn and XGBoost models, achieving end-to-end deployment across multiple prediction endpoints
- Built responsive analytics dashboard with interactive data visualizations using Recharts and Recharts components, featuring real-time demand metrics, state-specific analysis, and 30-day forecast calendars with dynamic filtering and 10+ REST API endpoints for data retrieval
- Implemented secure authentication system with Next.js middleware, role-based access control (admin/user), form validation using React Hook Form + Zod validation schema, and responsive UI components (shaden/ui) with Tailwind CSS v4 for cross-device compatibility

GBUAP – Attendance Management System | Jan 2025 – Jul 2025 [GitHub](#)

- Engineered a full-stack web application with a responsive front-end supporting 500+ student records and role-based UI views (Admin, Faculty, Student).
- Integrated AJAX-driven real-time page updates, reducing page reload time by ~35% and delivering a snappy, seamless user interface experience.

Education

B.Tech in Computer Science and Engineering | Gautam Buddha University | 2022 – 2026

CGPA: 7.6 / 10 (Till 7th Semester)
